Self-managed

Elastic self-managed subscriptions

The Elastic Stack — Elasticsearch, Kibana, and Integrations — powers a variety of use cases. And we have flexible plans to help you get the most out of your on-prem subscriptions.

Our **resource-based pricing philosophy** is simple: You only pay for the data you *use*, at any scale, for every use case.

Contact sales for more pricing information about self-managed licensing.

[1] For a more detailed discussion of our licensing options and 2021 licensing changes, please refer to the **licensing FAQ on our website**.

[2] Available under the Elastic License. Select features are also available under SSPL or Apache License 2.0. For questions about which features may be licensed under SSPL and Apache License 2.0, please contact **elastic_license@elastic.co**.

[3] Feature is currently not available in deployments on Elastic Cloud Enterprise.

[4] Customers whose Enterprise subscriptions use ECE/ECE Instances as the billing metric must agree to additional terms before they can access the Enterprise-level features listed

Free and open - Basic [1,2]	Platinum	Enterprise

SEARCH & ANALYSIS

subscriptions at no additional charge.

[8] *Access to administering Kibana subfeature privileges start at the Gold tier and are available on a per-feature basis matching the feature's subscriptions tier.*

[9] *Gold Subscription tier is no longer available for new customers, try Elastic Cloud Gold instead. Customers with existing Gold Subscriptions will continue to be supported through the end of its current subscription term.*

[10] [*Elastic GeoIP Database Service Agreement*](#)

[11] *Subject to Elastic Vector Tiles Data License Agreement*

[12] *Re-distributing the Windows release of Packetbeat and the Network Packet Capture agent integration for Windows hosts requires an additional license to npcap, a Windows packet sniffing library, that may be obtained from nmap.org.*

[13] *Advanced cluster rebalancing is based on observed data stream write loads described in* [*cluster-level shard allocation*](#)*.*

[14] *Access to the global managed testing infrastructure is for users running Elastic Cloud only. Self managed users can deploy their own testing nodes using private locations.*

[15] *Synthetic _source is an Enterprise feature from 8.17 onward.*

[16] *Updates provided through this subscription page exclude End-of-Life (EOL) products such as Enterprise Search or included features such as App Search, Workplace Search, Elastic web crawler or native connectors. For more details on discontinued products, please consult our* [*product subscription archive*](#)*.*
